- iPhone usage
- 1)How to do "streaming". 2) How to block "spam" and "ads" on cell phones and in e-mails, 3)Smart TV usage ie: how to rescan, etc. 4) How to "pair" various devices
- Interested in any automation for home security or home assistance for aging people. Less interested in Alexa, Siri, but prefer Google Assistant as far as an assistant is needed to accomplish security or assistance.
- Expanding the knowledge of the many uses of the iPhone. Many of us use only 10 percent of the capabilities of our handheld devices.
- Phone use & apps iPhone and Android. Have a program presenter KEEP 'chat' minimal, meetings to 1 hr.
- Programming and writing APPLICATIONS.
- TV Streaming overview, choices & comparisons iPhone overview, usage & capabilities The dangers of Social Media
- Creating, uploading, and managing YouTube Videos.
 - o How to know what you see and read on the Internet is real or intentional distortion. The Computer Club should advertise their monthly topics on SVE-P2P.
- Phones (android) - Apps (example., automation apps, phone tracking apps, games, etc.)
- I am fairly computer literate but still get stumped on some issues with the newest trends with applications.
- Writing a blog?
- I would love a class on the Mac computer. Basic information to start with and then expanding. I am a Mac user and struggle to find someone to help me.... I would love classes on the Mac. Thank you for reaching out .
- Smart tvs....what to look for in replacing technology and how to develop & link that piece into a whole smart house
- Learning zoom
- Software Programs such as Xcel, Power Point, Producer, Etc.
